OMCAR Palk Bay Centre supports programmes in coastal ecology field education and research. The facilities provide accommodation, food service and learning center for students of all ages and support.

Workshops, trainings, conferences for schools, NGOs, universities and government agencies. It is located in Velivayal village on the southern side of Agni estuary, Thanjavur District. The centre is only 3 km from Mallipattinam and 22km from Pattukkottai.

Mangrove Ecology Field Trips

Surrounded by mangroves, warm sandy beach and coconuts, the beautiful village of Velivayal offers placid coastal water for swimming, snorkeling and other recreational activities throughout the year.

The Center has a multipurpose conference hall for education programs, conferences and workshops, which can provide space for up to 50 participants. A two meter wide corridor is also available around the conference hall for breakout sessions or socializing.

The dining hall is located in the first floor. It can serve 50 people and can be arranged in banquet or by distributed table arrangements. Groups can choose to use the commercial kitchen or our chef can prepare meals and create custom menus. The centre can lodge 50 people overnight in common hall. Both western and indian toilets are located on the southern side.

Light House in Manora, located 5km from PBC

OMCAR Palk Bay Center can support a diverse array of scientific field research projects, and offer field education programmes in many scientific fields including mangrove ecology, seagrass ecology, soil science, oceanography, coastal resource management and fisheries.

Students can practically learn about nursery and tree plantation techniques in PBC Nursery

OMCAR Palk Bay Centre provides an excellent learning environment for school programs and teacher trainings. These programs provide participants with hands-on learning in coastal ecosystem. The programmes are geared to engage students of all ages to foster a better understanding of the natural world and strengthen their science skills.
